- Watches: While sales are expected to weaken following the resurgence of COVID-19, profitability is expected to improve.
- Machine Tools: Given that orders are recovering better than expected, both net sales and operating profit are expected to deviate above the forecast.

Watches (3Q Result)

#### **CITIZEN**

#### < Watch sales >

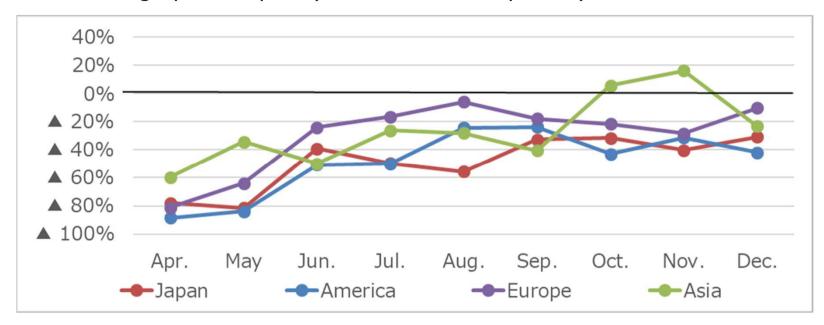

- Overseas market:Sales increased year on year in China, and sales also remained higher than expected in North America.
- Domestic market: The decline was shrinking although a sharp fall in inbound demand had an impact.
- < Movement sales >
- Demand for mechanical movements was steady, analog quartz movements was also gradually recovering.

## Watches Sales Conditions by Region

**CITIZEN** 

■ Rate of change year on year (on a local-currency basis)

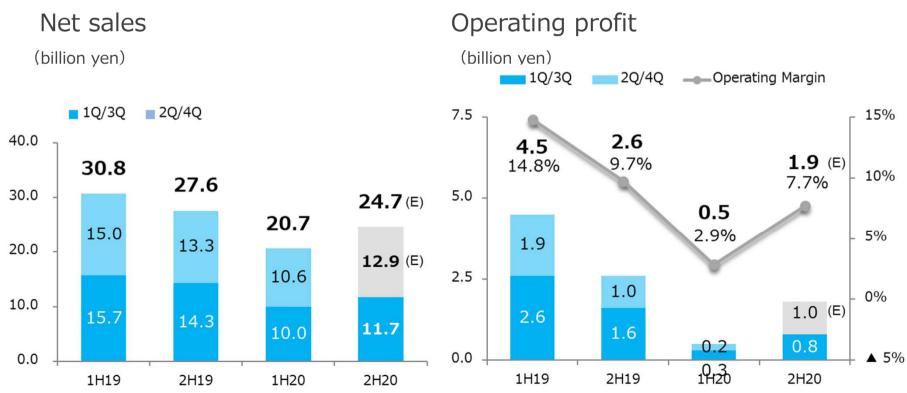

Rate of change year on year (on a local-currency basis)

|         | 1Q           | 2Q   | 3Q           |   |
|---------|--------------|------|--------------|---|
| Japan   | <b>▲</b> 69% | ▲46% | ▲35%         | There was a delay in recovery due to a fall in inbound demand and weak domestic demand.                               |
| America | <b>▲</b> 73% | ▲30% | <b>▲</b> 38% | There was a delay in recovery due to a fall in inbound demand and weak domestic demand.                               |
| Europe  | <b>▲</b> 57% | ▲15% | ▲22%         | While sales remained firm mainly in Germany, sales in Europe were stagnant due to the re-implementation of lockdowns. |
| Asia    | ▲48%         | ▲33% | <b>▲</b> 3%  | Sales were on a recovery trend as sales for e-commerce events were booming in China.                                  |

<sup>•</sup> The rate of change in total sales of CITIZEN brand watches and BULOVA brand watches only for North America. For other regions, the rate of change only in sales of CITIZEN brand watches.

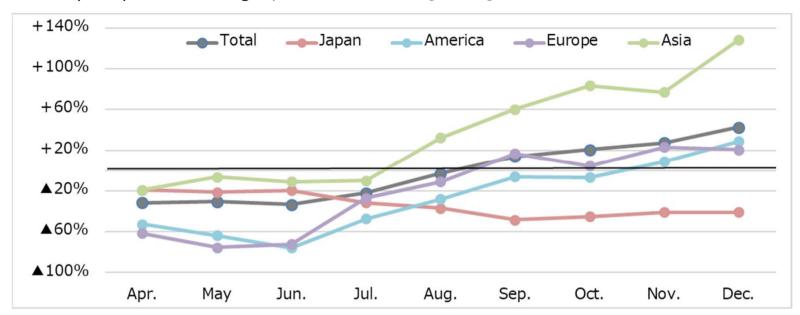

## Machine Tools (3Q Result)

- Domestic market:While a cautious stance on capital investment continued, a sense of bottoming out was observed.
- Overseas market:Performance remained strong in China, and the segment also performed solidly in Europe, showing a recovery trend.

## Machine tools Changes in monthly orders received (units) CITIZEN

Year-on-year percent change (three-month moving average of the numbers of units in orders received)

Year-on-year percent change (Quarterly number of units in orders received)

|                           | 1Q           | 2Q           | 3Q           |   |
|---------------------------|--------------|--------------|--------------|---|
| <ul><li>Total</li></ul>   | ▲34%         | +14%         | +43%         | The upward momentum continued mainly in the Chinese market. Orders were also on an upward trend in Europe and the Americas. |
| <ul><li>Japan</li></ul>   | ▲20%         | <b>▲</b> 48% | <b>▲</b> 41% | A cautious stance on capital investment continued, although inquiries began emerging in the automobile-related business.    |
| <ul><li>America</li></ul> | <b>▲</b> 76% | <b>▲</b> 6%  | +29%         | Remained firm because medical-related demand recovered, which had been shelved due to the impact of the COVID-19 pandemic.  |
| <ul><li>Europe</li></ul>  | <b>▲</b> 72% | +17%         | +20%         | While the automobile-related business remained weak, medical- and hydraulic machinery-related businesses were firm.         |
| <ul><li>Asia</li></ul>    | ▲11%         | +60%         | +128%        | IT- and automobile-related businesses grew mainly in China. Other Asian regions also showed a recovery trend.               |

#### Initiatives in Machine Tools Segment

#### CITIZEN

#### Low Frequency Vibration-Cutting (LFV) Technology<sup>1</sup>

- Started selling machine tools products equipped with LFV technology in 2013, and cumulative shipments reached 2,500 units in October 2020.
- To start selling "ANX42SYY," the first Miyano product equipped with LFV technology, in July 2021.
- LFV-compatible models: To increase to 10 models.

Miyano "ANX42SYY"

<sup>1</sup> Low Frequency Vibration-Cutting (LFV) Technology: Using CITIZEN's proprietary control technology, a processing technology to divide chips by making the servo axis vibrate in the cutting direction and setting the timing for "missing" so that the blade does not hit during cutting. This will help solve issues about chips and contribute to improved productivity.

#### Friction bonding technology<sup>2</sup>

- Started selling Cincom "L32" equipped with the residual material reduction function using friction bonding technology in November 2020.
- Received the Manufacturing Award of the 63rd Ten Greatest New Products Award sponsored by the Nikkan Kogyo Shimbun, Ltd. (for the fifth time and its first in four years since 2016 when it received the award for "L20-LFV").

Cincom "L32"

<sup>&</sup>lt;sup>2</sup> Friction bonding technology: CITIZEN's proprietary technology to significantly reduce residual materials after processing by softening materials by friction heat and bonding different materials by applying even stronger pressure. This will reduce material costs and contribute to reducing environmental burdens.

## Devices and Components (3Q Result)

- Precision machining components: Sales of auto parts increased associated with the market recovery.
  - Sales of switches decreased, but orders were on a recovery trend.
- Opto-devices:Sales of LED for lighting products and automobiles grew at a sluggish pace.
