Promoting environmental innovation	Striving to create new value through eco-friendly business activities in all products of the CITIZEN Group and in the entire process of the value chain	7 commence of the first section of the first sectio

Process of identification and review of materiality

As a member of the international community, since FY 2017, the CITIZEN Group has identified and prioritized materiality for fulfilling our responsibilities as a true global enterprise and realizing continued growth.

In the identification of materiality, together with reference to the principles and guidelines related to CSR and sustainability, such as the SDGs, the United Nations Global Compact, ISO 26000, Responsible Business Alliances (RBA), and GRI standards, we also ascertain on a comprehensive basis the social issues that are important to society and our stakeholders and then prioritize as our materiality the topics of particularly high importance in light of the CITIZEN Group's corporate philosophy, codes of conduct, medium-term management plans, and other business strategies.

In FY 2020, in line with the SDG compass, we ascertained the positive and negative impacts on

the SDGs of business activities throughout the value chain and mapped them along the two axes of their impacts on society and their importance to our businesses by prioritizing as materiality the five topics of high importance in terms of both of these axes.

In FY 2020, in order to enhance quality-related compliance throughout the group, we revised the materiality of quality initiatives into that of enhancing quality compliance. Furthermore, we revised the materiality of promoting responsible procurement into that of promoting sustainable procurement since these activities are intended not only to fulfill our social responsibilities but also to create new value. To carry out more effective initiatives related to these five materiality, we prepared a roadmap for the period through 2030 and established clear goals, measures, and key performance indicators.

The CITIZEN Group's roadmap may be viewed on our website https://www.citizen.co.jp/social/materiality/road_map/index.html
