1. Qualitative Information on the Consolidated Financial Results for the Six Months Ended September 30, 2023

(1) Qualitative data on the consolidated financial results

During the first six months under review, the Japanese economy continued to experience a moderate recovery in consumer spending, reflecting the normalization of economic activity. In North America and Europe, consumer spending remained firm due partly to increases in wages and employment, despite growing concern over an economic recession linked to inflation and rising interest rates. The Chinese economy experienced a sluggish recovery following the resumption of normal economic activity. Meanwhile, recoveries in other Asian regions were only moderate due to the lack of momentum in exports and weak demand for capital spending.

In this environment, the Citizen Group's consolidated results for the first six months of the fiscal year under review showed increases in sales and profits, with net sales of 152.9 billion yen (up 3.5% year on year) and operating profit of 13.5 billion yen (up 9.6% year on year). These results were driven mainly by strong performance in Watches. Ordinary profit and profit attributable to owners of parents also increased to 17.4 billion yen (up 3.7% year on year) and 13.3 billion yen (up 5.9% year on year), respectively.

Watches

In the domestic market, sales of Citizen brand watches increased, reflecting the firm performance of core brands such as Attesa and Promaster and the recovery of inbound tourism-related demand, despite a decline in consumer confidence linked to price increases.

Looking at overseas markets, the North American market showed signs of weakness in sales for distribution such as jewelry chain stores and department stores amid growing uncertainty about the future because the rate of price increases still remained high. Even so, sales increased, chiefly reflecting the strong performance of online sales. The European market suffered significant price increases. Despite this, sales climbed due to the strong performance recorded mainly in the UK and Italy, as well as good progress made in the acquisition of new customers in France. In the Asian market, sales increased, reflecting a continued upward trend in business in Taiwan and Singapore attributable to a recovery in the flow of people, as well as a gradual recovery in China although this recovery was still limited.

Sales of Bulova brand watches rose. This was attributable to, in the mainstay North American market, the cultivation of new sales channels including sales for tourism-related distribution, offsetting weak sales for main distribution channels such as jewelry chain stores.

Sales of movements were at the level of the previous year. Sales of mechanical movements were solid, but sales of analog quartz movements were slow due to concerns about a recession in the North American and European markets.

As a result, notwithstanding concerns about a decline in consumer confidence linked to the long-term price increases occurring globally, thanks to the progress made in initiatives for the enhancement of sales of global brands, premium brands and mechanical watches, the watches segment as a whole posted an increase in sales, with net sales of 78.5 billion yen (up 7.0% year on year). Operating profit increased 15.9% year on year, to 10.2 billion yen, mainly reflecting the contribution of increased net sales and the ongoing efforts to improve profitability.

Machine Tools

Sales increased in the domestic market due to firm sales in the construction machinery and medical equipment industries, among other industries, although shipments of automobile-related products were sluggish as a generally cautious stance on capital expenditures took hold. Sales in overseas markets were at the same level as the previous fiscal year. While sales fell in the Chinese market and other Asian markets as the markets remained sluggish, sales related to medical equipment in particular continued to perform well in Europe and the Americas.

As a result, the machine tools segment as a whole posted an increase in sales, with net sales of 41.4 billion yen (up 1.3% year on year). Operating profit fell to 5.2 billion yen (down 5.5% year on year) chiefly due to sharp rises in materials prices.

Devices and Components

In precision components, sales of automotive parts increased with the easing of shortages of parts supplies that had been caused by semiconductor shortages, together with a recovery in production at car manufacturers. Sales of small motors rose, reflecting market recoveries in a broad range of areas including medical products. However, sales of crystal devices decreased, reflecting sluggish demand growth in demand in the personal computer and IoT markets. As a result, sales in precision components as a whole were at the same level as the previous fiscal year.

In opto-devices, sales of chip LEDs decreased, reflecting a decline in sales of LEDs for lighting due to the delay in the recovery of demand for in-vehicle LEDs and slowdowns in the Chinese market and other Asian markets, which offset solid sales of chip LEDs for game consoles.

As a result, net sales in the devices and components segment as a whole decreased to 22.1 billion yen (down 3.2% year on year), but operating profit increased to 0.4 billion yen (up 1,708.2% year on year) due to a reduction in fixed cost.

Electronic and Other Products

In information equipment, the recovery of demand was weak due to the deterioration of the market environment outlook, resulting in the sluggish growth of POS printers and bar code printers. Even so, sales increased, reflecting strong sales of photo printers due to the growth of demand for events. Sales of healthcare products decreased, mainly reflecting a decline in demand for thermometers as a result of the reduced impact of COVID-19 and the reduced number of blood pressure monitors sold which is linked to price increases.

As a result, the electronic and other products segment overall recorded an increase in sales and a decrease in profit, with net sales of 10.7 billion yen (up 3.0% year on year) and operating profit of 0.6 billion yen (down 9.3% year on year), chiefly reflecting a decrease in profit from healthcare products.

(2) Qualitative data on the consolidated financial position

Total assets at the end of the first six months under review stood at 411.2 billion yen, an increase of 21.2 billion yen from the end of the previous consolidated fiscal year. Current assets increased 13.7 billion yen, mainly reflecting a 14.3 billion yen increase in inventories and a 6.8>5.2 billion yen increase in notes and accounts receivable – trade, offsetting a 3.5 billion yen decrease in cash and deposits. Non-current assets increased 7.5 billion yen, attributable chiefly to a 2.2 billion yen increase in machinery, equipment and vehicles and a 2.1 billion yen increase in leased assets.

Liabilities totaled 166.1 billion yen, an increase of 8.9 billion yen from the end of the previous consolidated fiscal year, chiefly reflecting a 2.6 billion yen increase in accrued expenses and a 2.0 billion yen increase in income taxes payable, which was partially offset by a 0.9 billion yen decrease in short-term borrowings.

Net assets increased 12.2 billion yen from the end of the previous consolidated fiscal year. This result chiefly reflected a decrease of 3.8 billion yen in shareholders' equity due to the purchase of treasury shares and payment of dividends amounting to 12.3 billion yen and 4.9 billion yen, respectively, and an increase of 13.3 billion yen in the foreign currency translation adjustment, as well as the posting of profit attributable to owners of parent.

Both retained earnings and treasury shares decreased due to the cancellation of treasury shares amounting to 39.1 billion yen.

(3) Qualitative data on the consolidated earnings forecasts

Economic conditions are expected to be on a moderate recovery trend. However, the outlook remains uncertain, chiefly due to monetary tightening to curb inflation and heightened geopolitical risks.

In the Company, the performance of the mainstay watches segment was stronger than expected, mainly in the European market, and sales of CITIZEN brand watches remained strong. In the machine tools segment, orders received are still in an adjustment phase. The devices and components segment is struggling due to a delayed recovery in the Chinese market.

Taking the above factors into account, the Company has revised its forecasts for full-year overall financial results and those for full-year financial results by business segment as follows.

The foreign exchange rates in the third quarter of the fiscal year under review and thereafter are assumed to be 145 yen against the U.S. dollar and 155 yen against the euro.
