Signature \_\_\_\_\_

We hereby certify that all products, components, source materials, packing materials, accessories and suchlike delivered to you, either directly or through a third party, do not contain any of the chemical substances listed below.

## Chemical Substance Control Standard Rank 1

43 substances and groups for which inclusion is prohibited

- |                                                       |                                                    |
|-------------------------------------------------------|----------------------------------------------------|
| 1) Aldrin                                             | Lindane)                                           |
| 2) Endrin                                             | 23) Chlordecone                                    |
| 3) Chlordanes                                         | 24) Hexabromobiphenyl                              |
| 4) Dieldrin                                           | 25) Tetrabromodiphenyl ether                       |
| 5) Hexachlorobenzene                                  | 26) Pentabromodiphenyl ether                       |
| 6) DDT                                                | 27) Hexabromodiphenyl ether                        |
| 7) N,N'-ditolyl-p-phenylenediamine                    | 28) Heptabromodiphenyl ether                       |
| 8) 2,4,6-tri-t-butylphenol                            | 29) Endosulfan                                     |
| 9) Toxaphene                                          | 30) Hexabromocyclododecane (HBCD)                  |
| 10) Mirex                                             | 31) Pentachlorophenol and its salts and esters     |
| 11) Bis(tributyl tin)oxide                            | 32) Polychlorinated linear paraffins (those having |
| 12) Polychlorinated biphenyl (PCB)                    | 10 to 13 carbon atoms and containing more than     |
| 13) Polychloronaphthalenes (with 2 or more chlorine   | 48% of chlorine by total weight)                   |
| atoms)                                                | 33) Decabromodiphenyl ether                        |
| 14) Dicofol                                           | 34) Perfluorooctanoic acid (PFOA) and its salts,   |
| 15) Hexachlorobuta-1,3-diene                          | PFOA-related substances                            |
| 16) 2-(2H-1,2,3-Benzotriazol-2-yl)-4,6-di-tert-butylp | 35) Asbestos                                       |
| henol                                                 | 36) Bis(chloromethyl) ether                        |
| 17) Perfluoro (octane-1-sulfonic acid)(also known as  | 37) 4-Aminodiphenyl                                |
| PFOS) and its salts                                   | 38) 4-Nitrodiphenyl and its salts                  |
| 18) Perfluoro (octane-1-sulfonyl) = fluoride)         | 39) Benzidine and its salts                        |
| 19) Pentachlorobenzene                                | 40) $\beta$ -Naphthylamine and its salts           |
| 20) $\alpha$ -Hexachlorocyclohexane                   | 41) Yellow phosphorous                             |
| 21) $\beta$ -Hexachlorocyclohexane                    | 42) Benzene adhesive (greater than 5% benzene)     |
| 22) $\gamma$ -Hexachlorocyclohexane (also known as    | 43) Ozone depleting substances                     |
